DETAILED ACTION

Claim Objections

1. Claim 29 is objected to because of the following informalities:

Regarding Claim 29, does the counter count clocks or clock pulses?

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Pfeiffer.

Regarding claim 20, Pfeiffer discloses in the patent entitled "Liquid container having a liquid consumption device therein" a measurement circuit segment for measuring a residual vibration of the detection device; and a detection circuit segment receiving a signal from the measurement circuit segment and outputting a signal indicative of the consumption status of the liquid contained in the liquid container on the basis of the output signal of said measurement circuit segment (Column 2, lines 17-35; Figure 1).

Regarding claim 21, Pfeiffer discloses where the measurement circuit segment measures a frequency of the residual vibration of the detection device (Column 2).

Regarding claim 22, Pfeiffer discloses where the measurement circuit segment measures at least one resonance frequency of the liquid surrounding the detection device (Column 2).

4. Claims 23-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 20-34 have been considered but are moot in view of the new ground of rejection.
